

Teacher Education

SUPOB form, which assesses organisational behavior and the classroom environment, including factors such as seating arrangements, lighting, and student-teacher interactions. Observations are conducted multiple times a year depending on a teacher's performance level, ensuring tailored guidance for continuous improvement. After each observation, teachers receive detailed, constructive feedback during one-on-one debriefing sessions, enabling them to refine their teaching practices. Moreover, our quality control team ensures that assessment practices such as midterm and final exams maintain content and construct validity, and that classroom participation and oral exams are evaluated uniformly. By addressing both pedagogical techniques and environmental factors, our quality control process guarantees a nurturing and effective learning environment, where both students and teachers can thrive.

Teacher Training Courses

The Teacher Training Courses at Safir Language Academy offer comprehensive programs designed to equip educators with the necessary skills to excel in various teaching environments. These include the On-Site Teacher Training Course (OSITTCO), which provides hands-on experience in real classrooms, blending theory with practice through live demonstrations, teaching practice, and immediate feedback from trainers. The Virtual Teacher Training Course (VITTCO) delivers the same quality education through a remote format, allowing teachers to develop their skills in a flexible, online setting. Safir also offers specialised training for teaching children, adults, and preparing students for the IELTS exam, ensuring that teachers are equipped for diverse teaching scenarios.

The Second Language Acquisition Research

We rely on studying the latest trends and scientific findings to improve teaching methods and enhance English language learning. This research allows us to adopt best practices and innovative techniques, fostering the professional development of teachers and creating a more effective learning environment for students. By leveraging these studies, Safir Language Academy continuously strives to enhance the quality of education.

Quality Control

Quality control is a key pillar in ensuring that both teaching and learning experiences consistently meet our high standards. The process involves comprehensive classroom observations carried out regularly by both internal branch managers and external quality control specialists. Teachers are evaluated using two main forms: the Teacher Performance Assessment (TPA), which focuses on teaching techniques introduced in our Teacher Training Courses, and the

Teacher Education Webinars

These webinars offer a dynamic platform for educators to enhance their skills in modern language teaching methodologies. Covering everything from classroom management to the use of AI in teaching, these sessions are perfect for both novice and experienced teachers. The webinars are led by industry experts and focus on practical, real-world applications that can be immediately implemented in the classroom. Recorded sessions are also available for those unable to attend live.

Teachers Without Borders (TEWIBO)

TEWIBO aims to connect educators across the globe, providing them with a platform to share ideas, resources, and best practices. This initiative fosters a community of teachers who are passionate about language education and committed to continuous professional development. Through workshops, collaborative projects, and research opportunities, TEWIBO empowers teachers to expand their horizons and make a global impact.
